IKASGAIA - MODULE	HIZKUNTA LANGUAGE	IRAKASLEAK TEACHERS
Tutore adimendunak, HP eta hizkuntzen ikaskuntza Education and NLP	Euskara English	Itziar Aldabe Ana Arruarte Montse Maritxalar
HP tresnak eta baliabideen erabilera ikaskuntzan eta gai orokoren ikasketa-prozesuan. We will experiment with NLP tools and resources for second language learning and general-domain learning processes.		
Itzulpen automatikoa Machine translation	Euskara English	Nora Aranberri Gorka Labaka
Itzulpen automatikorako paradigma desberdinak zehaztunez aztertuko dira, eta paradigmak konbinazioen beharra eta konbinazio horien mota desberdinak ikusiko dira. We will look into the different approaches to machine translation and the need to combine them, while considering different hybridization methods.		
Informazio elebakarraren eta eleanitzaren bilaketa eta erauzketa Web searching and Text Mining	Euskara English	Jordi Atserias Arantza Otegi
Web-bilaketaz eta informazio berreskurapenaz gain, informazio erauzketarako bestelako testu-meatzaritzarako metodoak ere aztertuko dira. Along with web-search and information retrieval, we will also explore text-mining methods for information extraction.		
Bukaerako mintegia Final seminar		

## Objectives

To analyse language and master techniques and applications for computational language processing:

- Ability to work in an interdisciplinary research group
- Familiarization with methods and tools for language technology research
- Ability to use existing applications in the field of language technology
- Ability to manage resources and information

## Addressed to

All graduates interested in linguistics and computing who hold one of the following degrees:

- BSc in Computational Linguistics
- BSc in Computer Science or in Telecommunications
- BSc in Mathematics
- BA in Linguistics or Philology
- BA in Translation & Interpreting
- Candidates from other disciplines may be considered

## Duration

February-June, on Fridays (15:00 - 18:30)

- Euskara (7,5 ECIS + 1,5 ECIS in English)
- English (9 ECIS)

## Embedded in a masters' degree

- Shared content with the Language Analysis and Processing (HAP) Master's Programme:

[http://ixa.siehu.es/master/sarrera\\_html](http://ixa.siehu.es/master/sarrera_html)

- Possibility of being incorporated to the Masters' degree in the academic year 2016/17
